Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Neuhaus.

Neuhaus discloses a computer assisted learning apparatus for displaying predetermined learning materials on a computer-controlled display screen wherein the screen includes multiple small screen sections having related-information display fields including an explanation text display field. (See Fig. 9)

From Abstract: "When a CD ROM video or audio library is accessed, animation and/or audio viewing and listening are made possible."

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Neuhaus in view of McCarthy et al. Neuhaus does not show four equally divided screens but a plurality of related screens. McCarthy et al teaches the display of four equally divided

Art Unit: 3714

screens from which it would have been obvious to one of ordinary skill in the art that Neuhaus could display four equally divided screens.

Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neuhaus in view of Gavron et al. Screen zoom function is a well known Microsoft Windows display feature as taught by Gavron et al ("Maximize Button") and would have been obvious to one of ordinary skill in the art to provide for the displays of Neuhaus to enhance visibility of a particular item. Moreover, content exchange can be done in a multiple Windows environment using the File menu and would have been obvious to one of ordinary skill in the art to employ in the Neuhaus invention. See Figs. of p. 23 of Gavron et al.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 9 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A computer program is non-statutory.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ramshaw discloses a computer training system. Miller discloses a multipurpose system. Dinis discloses a diving simulator.
